Aha! Snow, lightly powdering the ground in Burlington after all.
source: <http://burlingtontraffic.ca/>

Clouds are covering the entire country today but I don't know what the system is called or where the jet stream is. Other than being simply "winter weather" I have no insight here.

Surface Temperature on Thursday 05 Dec at 10am EST

The entirety of Canada other than for part of the west coast are below freezing. <https://www.weather-forecast.com/maps/Canada?hr=3&symbols=none&type=lapse>

<https://www.tpsgc-pwgsc.gc.ca/citeparlementaire-parliamentaryprecinct/newhillcam.jpg>

Ottawa is looking suitably cold. Looks like a tone of construction going on at the Parliament buildings. I wonder why. Where is Parliament being hdlle if there is this level of construction ... or DEconstruction going on?

Thunder Bay, Ontario is snow covered but not with a lot of snow.

Estrella Mountains

<https://www.phoenixvis.net/site.aspx?site=esmo1>

Phoenix and surrounding areas are misty, hazy and partly overcast. This is the first break from constant sun and 80°F temps we've had in a few months!
